The BMC C-Series was a straight-6 automobile engine produced from 1954 to 1971. Unlike the Austin-designed A-Series and B-Series engines, it came from the Morris Engines drawing office in Coventry and therefore differed significantly in its layout and design from the two other designs which were closely related. This was due to the C-Series being in essence an enlarged overhead valve ...

First introduced in 2001, the Honda K-series engine is a four-cylinder, four-stroke engine that replaced the B series. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributor-less ignition system with a coil for each spark plug. This system forgoes the use of a conventional distributor-based ignition timing ...

First introduced to the US as the engine for the 2002 Acura RSX and Civic Si, The K Series has proven itself a venerable, torque-strong powerplant. The K is a significant departure from the tried-and-true B series in several ways: In addition to VTEC, the K has variable cam timing. This allows for excellent economy while still providing amazing ...
