Value engineering began at General Electric Co. during World War II. Because of the war, there were shortages of skilled labor and raw materials. Lawrence Miles and Harry Erlicher at GE looked for acceptable substitutes for materials. They noticed that these substitutions often reduced costs, improved the product, and in some cases, both. What started out as an experiment driven by necessity ...

Value Engineering. Value Engineering (VE) is concerned with new products. It is applied during product development. The focus is on reducing costs, improving function or both, by way of teamwork-based product evaluation and analysis. This takes place before any capital is invested in tooling, plant or equipment. This is very significant, because according to many reports, up to 80% of a ...
